SUMMARY

Full-stack software developer building scalable web and mobile applications. Skilled in React, React Native, Node.js, Express, and PostgreSQL. Experienced in designing multi-agent AI systems, secure APIs, and real-time notification workflows. Strong understanding of Agile development, performance optimization, and ethical AI practices.

PROJECTS

Techmedix: Full-Stack Medicine Management and Wellness Platform - https://techmedix.onrender.com/ **Aug 2025 – Sep 2025**

- Built a full-stack healthcare platform for intelligent medicine management and patient adherence.
- Designed a custom multi-agent AI architecture to automate healthcare decision workflows.
- Implemented Agent-1 for prescription OCR and structured data extraction.
- Developed Agent-2 to detect medicine safety risks and drug interactions.
- Created Agent-3 for real-time price comparison, generic alternatives, and cost optimization.
- Built Agent-4 to manage adherence schedules, dose reminders, refill alerts, and stock-low notifications.
- Implemented Agent-5 to compare medicines based on salt composition and suggest equivalent alternatives.
- Developed a workflow orchestrator to run agents in parallel and aggregate decisions reliably.
- Developed a secure Doctor Panel using role-based access control for patients, prescriptions, and reports.
- Designed PostgreSQL (Neon) schemas and integrated notification logic for reminders, adherence, and refill alerts.
- Improved application performance by ~40% and achieved 95% mobile responsiveness.
- Followed Agile development practices and ensured data privacy and explainable AI outputs.

Wallet – Expense Tracker (Full-Stack Mobile Finance Application) - https://github.com/Aditya07024/Expense-Tracker-app **Aug 2025 – Sep 2025**

- Built a full-stack mobile expense tracker using React Native, Expo, Express, and PostgreSQL.
- Designed secure REST APIs with Redis-based rate limiting.
- Implemented Clerk authentication with 6-digit email OTP verification.
- Enabled real-time balance updates and transaction synchronization.
- Optimized API calls and UI rendering for smooth mobile performance.
- Implemented responsive navigation using React Navigation.

SKILLS

Frontend: React.js, Next.js, React Native, Expo, JavaScript (ES6+), Tailwind CSS, Shadcn UI
Backend: Node.js, Express.js, TypeScript, REST APIs, JWT Authentication, Clerk, Redis
Databases: PostgreSQL (Neon), MongoDB, SQL
AI & Architecture: Multi-Agent Systems, Workflow Orchestration, OCR, Prompt Engineering, LLM APIs
DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Postman, Figma
Methodologies: Agile, SDLC, Modular Architecture, API Security
Languages: Java, JavaScript, Python, C

ACHIEVEMENTS

- **1st Runner-Up – Agentathon (Tech Navya 2.0)** | Team Init2Win – for building a **multi-agent AI healthcare platform**.
- Reached **round 3 as a Solo Participant** in GLA University Hackathon
- Secured **12th position in a national-level hackathon** at Chandigarh University.

Advanced React | Certificate **June 2025**
Principles of UX/UI Design | Certificate **April 2025**

EXTRACURRICULAR ACTIVITIES

Design Team Member, [Aura Club] **Up to 2024**

- Designed posters and social media graphics for campus events.

EDUCATION

Bachelor of Technology in Computer Science, GLA University, Mathura — CPI: 7.06/10 Jun 2023 – Jun 2027

Intermediate, St. Paul School, Mathura, 67.8% Apr 2020 – May 2022

High School, St. Paul School, Mathura, 60.8% Apr 2018 – May 2020
